Instructions:

- Project Goal:
 - Build Something Awesome
- Requirements:
 1. Must use at least two APIs
 2. Must use AJAX to pull data
 3. Must utilize at least one new library or technology that we haven't discussed
 4. Must have a polished frontend / UI
 5. Must meet good quality coding standards (indentation, scoping, naming)
 6. Must NOT use alerts, confirms, or prompts (look into modals!)
 7. Must have some sort of repeating element (table, columns, etc)
 8. Must use Bootstrap or Alternative CSS Framework
 9. Must be Deployed (GitHub Pages or Firebase)
 10. Must have User Input Validation
- Presentation Date:
 - Two Weeks from Today (Oct 1, 2019)
